Make your home more energy efficient

If you've been thinking about making your home more energy efficient, now is a great time to do it.

The Springfield Utility Board (SUB) offers rebates and interest-free loans on some energy-saving and cost-cutting measures that will bring down your utility bill.

Look inside for more information.

What kind of homes are eligible?

If your home is served by SUB, you're off to a great start. This includes conventional site-built, stick-built, manufactured homes, rental properties and multi-family complexes.

To be eligible for the weatherization subsidy, your home must have permanently installed electric heat. For window loans, your home must be fully insulated.

When you're ready to make it happen, contact SUB at the number or address below and they'll help you improve your home and fill out the paperwork.

Weatherization program

Getting the work started

- ▶ Contact Energy & Conservation Services to schedule an audit.
- ▶ Get three bids from the SUB weatherization installers list. (If you're doing the work yourself, only your proposal is needed). For a complete list, contact SUB.
- ▶ Submit bids and limited income application, if applicable, to SUB at 223 A Street, Suite B. Let us know at that time if you're applying for a rebate or loan.
- ▶ SUB will review bids with you and send the application to First Tech Credit Union.
- ▶ First Tech will notify you if it is approved.
- ▶ Upon approval, contact your contractor to schedule work.
- ▶ Your contractor will arrange pre-inspections with SUB.
- ▶ SUB will contact you to schedule a final inspection after it receives a final invoice from the contractor.
- ▶ Important: NFRC energy performance stickers must remain on all windows until final inspection.
- ▶ First Tech will generate the final payment for work that has been inspected and approved by SUB.

Funding options

- ▶ 0% loans or 50% rebate for insulation measures (available through December 2007).
- ▶ 0% loans for window replacement. Maximum loan term 48 months (\$4,000 cap).
- ▶ 100% rebate on insulation measures for qualified limited income customers (call to request application).

Recommended weatherization measures

- ▶ Insulation: attic R-38, floors R-19, walls R-11, ducts R-11.
- ▶ Windows: Energy Star qualified product with a 0.30 U-value or lower.

Heat pump program

Getting the work started

- ▶ First, obtain one or more bids from a SUB-approved contractor. Contact SUB for a complete list. SUB does not recommend any specific contractor or product, but does have customers' evaluations available for review.
- ▶ For the rebate: Complete and sign the rebate election form and return it to SUB along with a copy of the contractor's bid that you have chosen. Upon approval by SUB, schedule work with your contractor.
- ▶ For the loan: Complete and sign the Loanliner application and return it to SUB along with a copy of the contractor's bid that you have chosen. Note: you will be responsible for any binding contracts signed prior to loan approval and authorization.
- ▶ Upon loan approval, you can contact your contractor to schedule work.
- ▶ When the installation of the heat pump system is complete, your contractor will notify SUB for inspection.
- ▶ After SUB has inspected the heat pump installation, payment will be issued to the contractor(s), and you will receive your rebate from SUB or your payment coupon book from the lender.

Funding options

- ▶ \$500 rebate or 0% loan available through December 2007. Maximum loan term is 60 months with a \$8,500 cap (The cost of a new heat pump system can exceed \$8,500. Customer is responsible for additional financing.)
- ▶ Application and loan serviced by First Tech.

Heat pumps that qualify

- ▶ Air source heat pumps or gas backup heat pumps: Energy Star labeled or 8.5 HSPF* for split units and 14.0 SEER* ratings for split systems.
- ▶ Ground source heat pumps: 3.0 COP* or higher.

Additional requirements

- ▶ Qualifying systems must have a programmable thermostat. (Note: the auto changeover option is suggested for your convenience).
- ▶ Duct systems need to be tested for efficiency. If leaks are detected, ducts must be sealed and tested to PTCS specifications.

Term guidelines - Program & Funding levels subject to change without prior notification. (revised 01-01-2005)

\$0 to \$499 - 12 months.
\$500 to \$1,000 - 24 months.
\$1,001 to \$2,000 - 36 months.
\$2,001 to \$4,000 - 48 months.
\$4,001 to \$8,500 - 60 months
(heat pump only).

*HSPF - Heating Seasonal Performance Factor
*COP - Coefficient of Performance
*SEER - Seasonal Energy Efficiency Rating
