

## Make your home more energy efficient

If you've been thinking about making your home more energy efficient, now is a great time to do it.

The Springfield Utility Board (SUB) offers rebates and interest-free loans on some energy-saving and cost-cutting measures that will bring down your utility bill.

### ■ What kind of homes are eligible?

If your home is served by SUB, you're off to a great start. This includes conventional site-built, stick-built, manufactured homes, rental properties and multi-family complexes.

To be eligible for the weatherization and heat pump subsidy, your home must have permanently installed electric heat. Your home must also be fully insulated. For which SUB also provides incentives or loans.

When you're ready to make it happen, contact SUB at the number or address below and they'll help you improve your home and fill out the paperwork.
